

# Q F A

## Quick Fluid Adjuster

QUICK AND SIMPLE  
SOLUTION TO ADJUST  
THE FLUID OUTPUT  
ON THE FLY

# INTRODUCING THE NEW QUICK FLUID ADJUSTER BY ANEST IWATA.

## SWIFT ADJUSTMENTS

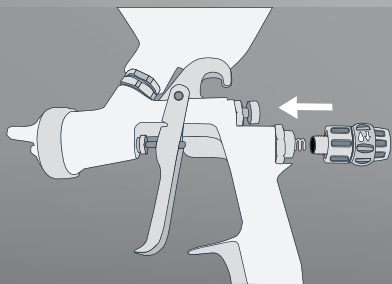

With the QFA, you can effortlessly adjust paint delivery from fully open to reduced flow in a matter of seconds. No more hassle, just smooth and seamless adjustments!

## EASY TO USE

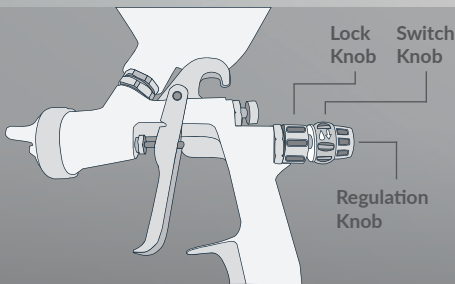

Designed for convenience, the QFA is user-friendly and intuitive. Simply twist, turn, and dial in the perfect paint flow for your project.

## ENHANCE PRODUCTIVITY

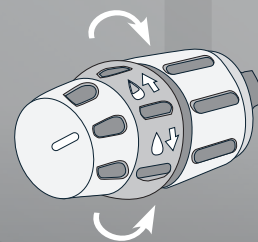

By streamlining the adjustment process, the QFA helps you save valuable time and get more done without compromising on quality.

**1.** The original fluid knob of a spray gun must be replaced with the Quick Fluid Adjuster (QFA), ensuring swift and seamless adjustments for optimal performance.

**2.** The regulation knob is used to adjust the desired paint delivery. The lock knob fixes the position of QFA on the spray gun. The switch knob changes the paint delivery.

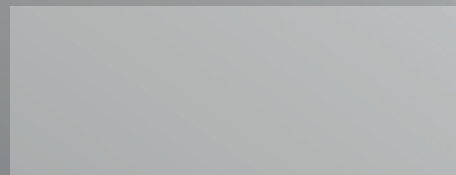

**3.** The switch knob has two positions; rotating counterclockwise provides full paint delivery, while rotating clockwise provides reduced paint delivery.

## QFA COMPATIBILITY CHART

Code Number: 930721A0
